

PlanAI

Your AI-Powered Public Consultation Assistant

PlanAI uses ethical, human-in-the-loop AI to deliver instant, accurate insights from complex consultation documents - helping planning professionals save time, reduce administrative burden and make better-informed decisions.

Main Features

- **Seamless multi-document processing:** Upload and analyse multiple public consultation documents and submissions. PlanAI has been designed to handle multiple formats including PDFs. Fully integrated into JDi Solution's [OpusConsult](#) platform.
- **Clear, concise AI summaries:** Integrated with Azure OpenAI to generate accessible, British English bullet-point summaries of every submission.
- **Analyse themes across responses:** We further analyse key themes and issues raised across all responses and matched to each section of a planning document.
- **Human oversight and final approval:** Maintain quality and context with editable summaries. Planning teams can review, refine, and approve AI outputs before integrating them into reports or decision-making.
- **Secure and compliant document management:** Your data is protected with role-based access control, secure file handling, and single sign-on authentication. PlanAI is fully GDPR compliant and processes data using UK-based servers.

Benefits

- **Significant time savings:** In a [pilot with Greater Cambridge Shared Planning](#), summarising 320 public submissions across three SPDs took planning officers 18 hours. PlanAI completed the same task in 16 minutes including additional analytical reports on response patterns and key themes.
- **Granular geospatial analysis:** Generate maps showing which communities responded to a consultation, including breakdowns by Index of Multiple Deprivation and Output Area Classification.
- **Developed for UK planning:** Trialled on over 500,000 real-world submissions and built to align with UK planning frameworks and standards.
- **Enhancing democratic participation:** Real-time AI summaries allow users to instantly review and edit outputs, increasing transparency and engagement in the consultation process.
